

Waking up to freshly made tea is a uniquely British love. The long and distinguished history of the TEASMADE is embodied in this latest incarnation, which has a decidedly 21st century outlook!

Of course the TEASMADE still wakes you up with a nice, fresh cup of tea (or coffee if you wish). This latest model also benefits from a backlit, LCD clock, sleek modern styling to suit any bedroom or living space, high quality ceramic pot, and of course the reading light, which no TEASMADE would be complete without.

the iconic classic returns
